

## The Prep Course Source for Pharmacy Technicians

Mary Anna Marshall, CPhT

Dear Future Students:

It is with great pleasure that I would like to announce the launch of [TheTechnicianTrainer.com](http://TheTechnicianTrainer.com), a new online prep course for successfully passing the PTCB National Certification Exam.

Ten years ago, after fifteen years of experience as a Pharmacy Technician working in all settings (retail, hospital, long-term care, chemotherapy, and compounding), I embarked on a career in education and instruction. It was then that I discovered my passion, and my talent, for teaching. Over the past ten years I have helped thousands of students like you to study for and to pass the PTCB National Certification Exam. And in 1998, I founded The Virginia Institute for Pharmacy Technicians, which has a 99% success rate of students passing the PTCB Exam on their first try.

Now, after twenty-five years in pharmacy, I have developed [TheTechnicianTrainer](http://TheTechnicianTrainer.com) so I can educate more and more students, regardless of geographic location. Finally, after only being able to help students studying for the PTCB Exam in Virginia, I am able to reach out across the country and prepare limitless numbers of students for taking the PTCB Exam... and for passing it on their first go.

I am confident that you'll find [TheTechnicianTrainer](http://TheTechnicianTrainer.com) to be the most comprehensive study guide on the internet. With seven course Modules, seven practice quizzes and a practice final exam, [TheTechnicianTrainer](http://TheTechnicianTrainer.com) covers *everything you need to know, and nothing you don't*. Each course Module includes dozens of sample questions, and the interactive quizzes and practice exam model the questions you'll find on the PTCB Exam. In all, there's over 250 sample questions contained in [TheTechnicianTrainer](http://TheTechnicianTrainer.com). In addition, [TheTechnicianTrainer](http://TheTechnicianTrainer.com) offers students extra support through my weekly chat room sessions and with an open invitation to e-mail me your questions anytime.

Whether you're a Pharmacy Technician who wants to advance your career by becoming Nationally Certified, or a career-changer who wants job security in a rapidly-growing industry, [TheTechnicianTrainer](http://TheTechnicianTrainer.com) will help you to reach your goals!

I invite you to visit [TheTechnicianTrainer.com](http://TheTechnicianTrainer.com) to learn more about my program, and please feel free to [e-mail](mailto:maryanna@the-technician-trainer.com) me with any questions you may have.

Happy Studying!
